EDRS PRICE	MF01/PC07 Plus Postage.
DESCRIPTORS	At Risk Persons; *Child Health; Elementary School Students; Elementary Secondary Education; Health Promotion; *Primary Health Care; School Community Relationship; *School Health Services; Secondary School Students
IDENTIFIERS	*Comprehensive School Health Programs; *Integrated Services

ABSTRACT

This directory identifies 254 Community and Migrant Health Centers (C/MHC) and Health Care for the Homeless (HCH) programs in 10 regions of the United States that, in response to local requests and with mostly local resources, developed either school-based or school-linked health programs. Each listing provides information under the following headings: address, contact, type of program, health care and other services provided, service providers, relation to Head Start, non 329/330/340 funding sources, problems encountered, program history, and plan for the next 2-5 years. Two appendixes provide a list of persons on the Bureau of Primary Health Care workgroup on school health and an address list of Ready-To-Learn School Health Program Conference Speakers. (AMH)

For adminstrative use: the information in this Directory is intended primarily for use by staff of the Bureau of Primary Health Care and others involved in the administration and management of Bureau-funded programs. The Bureau of Primary Health Care is located in the Health Resources and Services Administration, part of the Public Health Service, U.S. Department of Health and Human Services.

Included is information provided by the C/MHC and HCH programs, with the assistance of the PHS Regional Offices. As is always the case with self-reporting, the information supplied is based on the interpretation of the respondents, and some variation may be found in the use of terms such as "school-based" and "school-linked".

March 1993

Dear Colleague:

I am pleased to present to you this "Directory of School Health Primary Care Programs in Community and Migrant Health Centers and Health Care for the Homeless Grantees".

The Bureau of Primary Health Care funds Community and Migrant Health Centers (C/MHC) and Health Care for the Homeless (HCH) programs which form a network of primary care delivery systems throughout the country that increase access to care for poor and underserved populations. The Directory identifies 254 C/MHC and HCH programs that, in response to local requests and with mostly local resources, developed either school-based or school-linked health programs. This represents about one-third of the Federally-funded C/MHC and HCH programs.

As you will see, there is a great variety of school health programs - some provide a few basic services while others offer a full range of comprehensive case-managed care. These programs provide the opportunity for prevention, early detection, and prompt intervention of health and related conditions that can compromise a child's ability to learn and grow to his or her full potential.

All of these programs share a vision that we can help children grow up healthy and strong, and that we can teach them how to lead healthy and responsible lives. It is a vision that includes fostering an interest in one's own health, as well as the health and well-being of others.

Please join me in commending the many dedicated people working to ensure the health of our Nation's children. We believe these programs present models to be duplicated by others and hope this directory will enhance that opportunity.

Marilyn H. Gaston, M.D.
Assistant Surgeon General

School Health Primary Care Programs in C/MHC and HCH Grantees

ACNOWLEDGEMENTS

In addition to the C/MHC and HCH programs, special thanks are due to the following people who helped assemble this Directory:

School Health Primary Care Programs in Community and Migrant Health Centers and Health Care for the Homeless Grantees

FOREWORD

School Health Primary Care Programs

While evaluations of school health programs are limited, there is mounting evidence that they are a highly effective way of addressing a host of inter-related problems that prevent children from reaching their full potential.

Many children, especially those who live in poverty, have health and health-related problems that compromise their ability to learn in school. They are exposed to environments that do not foster healthy decisions about school or lifestyle. For these children, the decreased ability to learn in school can set off a series of events which lead to and perpetuate the cycle of poverty.

School health primary care programs can improve the health status of children by the prevention, early detection, and prompt intervention of health and related conditions, thereby reducing absenteeism and increasing participation in school activities.

They can also foster an interest in health as a foundation to build self-esteem and personal responsibility. An indirect result may also be an interest in health as a career choice and a goal for the future.

The Bureau of Primary Health Care

The Bureau of Primary Health Care (BPHC) is located in the Health Services and Resources Administration (HRSA), one of eight agencies of the Public Health Service (PHS) within the Department of Health and Human Services (DHHS). BPHC's mission is to provide support for high quality, community-based systems of care that increase access to primary health care for underserved populations.

As the Federal focal point for the delivery of primary health care services to poor and underserved populations, BPHC programs provide care for 7.3 million people. This is done through the development and expansion of primary care systems such as community and migrant health centers (C/MHC), health care for the homeless (HCH) programs, primary care in public housing programs, as well as through the National Health Service Corps placement of primary care providers in underserved areas.

BPHC programs also target the primary care health needs of special populations such as high-risk pregnant women and children, substance abusers, and people with HIV/AIDS.

Community and Migrant Health Centers, Health Care for the Homeless Programs, and School Health Programs

BPHC programs are targeted at the highest risk populations whose multiple health and social problems require carefully designed and coordinated comprehensive care. They face emerging health care problems, such as drug resistant tuberculosis and gaps in immunization, while offering high quality, family-oriented, and case-managed care.

C/MHC and HCH programs are ideally suited to collaborate with local schools and school districts to provide school health services. They offer an already established system of comprehensive primary care services, including case management and referrals, that are tailored to the needs of the community's most vulnerable populations. By forging collaborative relationships with the schools, the C/MHC

and the HCH programs are fulfilling their mandate to the underserved by expanding their delivery sites to include schools and are responding to local requests for school health services.

The advantages to a school system are both programmatic and financial. Schools have the advantage of utilizing highly trained health professionals who are already in a delivery system with a network of health and social services referral arrangements. The programs are staffed by highly skilled people with expertise in areas such as medical records and health care management. The school system can take advantage of being part of a larger system that handles professional licensure, insurance, practice standards, etc.

Linking schools with C/MHC and HCH programs is advantageous for both the health centers and the schools. However, children benefit most from the linkage since they do not have to miss school to get health care and do not suffer needlessly for the lack of health care.

Development of the Directory

The Directory is part of a process that began in January 1992 to prepare for possible implementation of BPHC's Ready-To-Learn School Health Program, which was included in the Administration's FY 1993 budget. The planning included the formation of an Ad-hoc Workgroup on School Health, and four regional Ready-To-Learn School Health conferences. (Members of the Ad-hoc Workgroup and speakers at the conferences are listed.) The Directory serves as a resource to programs that are starting or expanding primary care school health programs, as well as to determine the extent of linkages between C/MHC, HCH programs, and schools.

Of the 630 C/MHC and HCH programs with over 1500 sites, we have identified 254 primary care school health programs. Every attempt was made to reach all centers to assess their involvement in school health programs.

School Health
Primary Care Programs in
C/MHC and HCH Grantees

REGION: I

■ Blackstone Valley Community Health Care, Inc.

9 Chestnut Street
Central Falls, Rhode Island 02863

Contact:

Chris Shea
Executive Director
(401) 724-7110

Type of Program:

School-Based

Population Served

80% Hispanic, 20% White; 350 students ages 7-17 years;

Health Care and Other Services Provided

- Physical exams
- In-service training
- Acute Care

Service Providers

- Referrals to specialists when appropriate
- Internal staff

Relation to Head Start

Not Applicable

Non 329/330/340 Funding Sources

- Central Falls School District

Problems Encountered

- Insufficient provider time
- Inability to find financial resources beyond minimum state requirements

Program History:

- Initiated in 1990 between Blackstone Valley Community Health Care and Central Falls Schools to fulfill basic state requirements regarding physical exams, nursing protocols and emergency situations. BVCHC was also concerned with continuity of care. Includes 8 schools in Central Falls.

Plan for Next 2-5 Years:

- Development of a full school-based program in Central Falls and Pawtucket schools.
- Full time provider staff on-site.
- Extensive programming in nutrition starting in pre-school.
- Health Education at each grade level provided in connection with BVCHC staff; health career training.

Boston Health Care for the Homeless Program

723 Massachusetts Avenue
Boston, Massachusetts 02118

Contact:
Joan Quinlan
Administrator
(617) 534-7779

Type of Program:
School-Linked

Population Served
60% Black, 26% White, 11% Hispanic, 3% Native American; Poor urban students and homeless, ages 5-19 years

Health Care and Other Services Provided
- Physicals
- Family planning
- Case management
- Some primary care

Service Providers
- School nurses
- Community health centers and local hospitals

Relation to Head Start
Not Applicable

Non 329/330/340 Funding Sources
- State
- Local
- Private

Problems Encountered
- Shelters are full to capacity. Housing families in motel rooms

Program History:
- School linkage began in 1987

Plan for Next 2-5 Years:
- Maintain health delivery system in view of rising number of homeless families

Bridgeport Community Health Center, Inc.

471 Barnum Avenue
Bridgeport, Connecticut 06608

Contact:
Ludwig M. Spinelli
Executive Director
(203) 333-6864

Type of Program:
School-based/School-linked

Population Served
86% Hispanic, 12% Black, 1% Asian; Ages 10-19 years, Urban, Low income

Health Care and Other Services Provided
- Primary care
- Prenatal Care
- Physicals
  - Acute care
  - Family planning
  - Sports physical exams

Service Providers
None Reported

Relation to Head Start
- Some physicals

Non 329/330/340 Funding Sources
- State
- 3rd party
- Very little private funding

Problems Encountered
- Schools closed in summer so school based clinics closed-no health care to those students

Program History:
- School linkage 1986

Plan for Next 2-5 Years:
- Establishing another school based clinic

Bucksport Regional Health Center

P.O. Box 447
Bucksport, Maine 04416

Contact:
Jack Corrigan
Executive Director
(207) 469-7371

Type of Program:
School-Linked
Population Served
99% White; Ages 5-19 years

Health Care and Other Services Provided
- Episodic trauma
- Sports physical
- Immunizations
- Well child Clinic

Service Providers
- Physician

Relation to Head Start
- Separate from school program

Non 329/330/340 Funding Sources
None Reported

Problems Encountered
None Reported

Program History:
- Project is scheduled to begin in May 1992
- Negotiating for school nurse to start July 1992

Plan for Next 2-5 Years:
- Establish a formal presence of health care providers in school.

City of Portland Public Health Division (Health Care for the Homeless Project)

389 Congress Street
Room 307
Portland, Maine 04101

Contact:
Meredith L. Tipton
Director Public Health Division
(207) 874-8300 x8784

Type of Program:
School-Linked

Population Served
100% White; Ages 14-18, Low income, Below poverty level

Health Care and Other Services Provided
- **Primary health care**
- **Reproductive health**
- **Teen clinic**
- **Planned Parenthood**

Service Providers
None Reported

Relation to Head Start
- Served through our Pediatric Health Care Service

Non 329/330/340 Funding Sources
- Local property tax
- Title V
- Medicaid fee

Problems Encountered
None Reported

Program History:
- School linkage 1989
- School-based clinic concept was defeated 4 years ago. This was developed to increase access to primary health care for low income and medicaid eligible children.

Plan for Next 2-5 Years:
- Develop 2 more school-linked health clinics at elementary schools in our low income neighborhoods

Community Health Center of Burlington

279 North Winsooki Avenue
Burlington, Vermont 05401

Contact:
Mark Fernari
Homeless Health Care Coordinator
(802) 862-9011

Type of Program:
School-Linked

Population Served
99% White, 1% other; Ages 5-19; homeless students, Metropolitan, Below poverty level 147 students per year

Health Care and Other Services Provided
- Physicals
- HIV counseling
- Sports physicals
- STD's
- Substance abuse counseling
- Audio/Visual Screening
- Pregnancy exams
- Dental exams
- Immunizations
- X-ray

Service Providers
- Dentists
- Health Educators
- Nutritionists
- Social Workers
- Mental health counselors
- X-ray Technician
- Physician
- Registered nurse

Relation to Head Start
Not Applicable

Non 329/330/340 Funding Sources
None Reported

Problems Encountered
- If services are not on site, students drop out of the programs, so we provide transportation to health center.

Program History:
- School linkage 1988

Plan for Next 2-5 Years:
- Relocate the facility into the consortium building

Community Health Services, Inc.

520 Albany Avenue
Hartford, Connecticut 06120

Contact:
Clifford U. Portis
Executive Director
(203) 249-9625

Type of Program:
School-based/School-linked

Population Served

Non 329/330/340 Funding Sources
- Martin Luther King, Jr. High School
- Donations
- Revenue from prepaid program

Problems Encountered
Violence, child abuse, suicide, substance abuse, diabetes, hypertension

Program History
Funding received 5/27/92 from Pew Foundation to get started.

Plan for Next 2-5 Years
Stronger health education
Develop more linkages with other schools

Delmarva Rural Ministries

26 Wyoming Ave.
Dover, DE 19901

Contact
Gail Stevens
Director of Health Services
(302) 678-2000

Type of Program
School-Linked

Population Served
Approximately 300 farmworkers' children; ages 6 through 17. Migrant Education Program Tri-State Wide.

Health Care and Other Services Provided
- Primary care
- Case management
- Transportation
- Health Education
- Family Planning
- STD's

Service Providers
- Health Educator
- Pediatrician

Relation to Head Start
Combined with Migrant Education in some areas. Otherwise Well-Child physical are provided.

Non 329/330/340 Funding Sources
None Reported

Problems Encountered
None Reported

Program History
1975 working and providing health care to Migrant workers.

Plan for Next 2-5 Years
Become more involved with two "downstate" school-based health programs.

E.A. Hawse Retirement Village, Inc. (E.A. Hawse Health Center)

P.O. Box 97
Baker, WV 26801

Contact
Joyce M. Teets
Administrator
(304) 897-5915

Type of Program
School-based (Pilot project to begin in September 1992) and School-linked

Population Served
99% White, 1% minority; Rural; Low income; Begin with ages 5 through 14 and expand to ages 15 through 19

Health Care and Other Services Provided
- Primary Care
- Physicals
- Sports physicals
- Nutrition education
- Health education
- Prevention education

Service Providers
- School Nurse
- School Teachers
- Cooks

Relation to Head Start
A component of Head Start

Non 329/330/340 Funding Sources
- Board of Education

Problems Encountered
Assuring community we will not be a family planning clinic. There is a fear that we will take over the school system

Program History
Operation will begin September 1992.

Plan for Next 2-5 Years
To set up a clinic in school, staffed with mid-level medical staff several hours daily. Attempting to target all aspects of health care; promotion, protection, prevention activities.

Eastern Shore Rural Health Systems, Inc.

8 North St.
Onancock, VA 23417

Contact
Sr. Catherine Dever
Project Director
(804) 787-7373

Type of Program
School-Based

Population Served
2,200 middle school children; Rural, poor, minority population who are uninsured; 5 sites; ages 8 through 13

Health Care and Other Services Provided
- Primary health
- Immunizations
- Primary care sites
- Mental health

Service Providers
- Social services
- Pharmacy
- Pediatrician
- Case Manager

Relation to Head Start
Not Applicable

Non 329/330/340 Funding Sources
- Office of Rural Health Policy

Problems Encountered
Transportation and adequate facilities within the schools are the greatest barriers.
The school facilities are totally inadequate to provide primary care and they are financially unable to renovate all five schools. With only one exam unit, this creates downtime for the pediatrician.

Program History
School linkage 1991

Plan for Next 2-5 Years
To get a medical mobile van fully equipped with two exam rooms, lab, office, etc. to provide the privacy, flexibility, and space needed.

FOR Sto-Rox Family Health Council, Inc. (Sto-Rox Neighborhood Health Center)

710 Thompson Ave.
McKees Rocks, PA 15136

Contact
Susan Engle
Nurse Practitioner
(412) 771-6460

Type of Program
School-Linked

Population Served
1,700 mostly low income children; Rural; First through 12th grade

Health Care and Other Services Provided
- Yearly physicals, grades 1, 6, and 11
- Teen esteem program
- Teen Pregnancy Prevention Task Force
- Substance abuse prevention
- Sports physicals
- Psychosocial intervention

Service Providers

Relation to Head Start
Bus their classes en masse to center for physical exams

Non 329/330/340 Funding Sources
- School

Problems Encountered
Strict board regulations regarding sex education prohibit a formal approach to AIDS and pregnancy prevention education

Program History
School linkage 1986

Plan for Next 2-5 Years
Hope to expand on the health promotion disease prevention activities at the time of the yearly physical.

Expand dental services
Expand early training program

Erie Family Health Center, Inc.

1656 West Chicago Avenue
Chicago, IL 60622

Contact
Clarice Hearne
Director of Development
(312) 666-3488

Type of Program
School-Linked

Population Served
2,000 low-income Hispanics ages 11-19; 200 low-income predominantly Black children in grades 6-12.

Health Care and Other Services Provided
- Health education
- Case Management
- Prenatal classes
- School physical
- Primary Care
- School physicals

Service Providers
- Nurse-midwife
- Registered Nurse
- Health educator
- Outreach workers
- Clinical psychologist
- Physician

Relation to Head Start
Erie staff provide physical and immunizations for Project Head Start at settlement houses in the area, and health advocacy in conjunction with the local Infant Mortality Reduction Initiative.

Non 329/330/340 Funding Sources
- Private foundation
- Illinois Department of Public Health
- Chicago Department of Health

Problems Encountered
Need more contact with students, especially teens. Not enough provider appointment slots. Not enough space for clinical follow-up.

Program History
Began Erie Teen Health Center in 1984 and outreach team in 1988.

Plan for Next 2-5 Years
Deployment of community health nurses to do health education and case management in the primary grades. Increased focus on family health education in all School-Linked programs. Establishment of a 16-and-under clinic at our Teen Center linked to a specific intensive school-based health education program for students ages 11-16. Establishment of a Southwest Humboldt Park satellite center to provide primary care to students in need of care who are identified in outreach efforts.
As part of Chicago's Health Start Initiative, Erie is proposing moreSchool-Linked programming.

Contact
Nancy E. Hook, Regional Administrator
(602) 933-9671

Type of Program
School-Linked

Population Served
Ages 3-13, low income, Hispanic farm-worker families. Approximately 800 encounters per year.

Health Care and Other Services Provided
- Primary care services
- WIC program
- Preventive care
- Family planning
- Crisis intervention
- AIDS education
- Social services
- Acute care
- Referrals
- Nutrition education
- Health and developmental screening

Service Providers
- Registered Nurse

Relation to Head Start
Physical exams, referrals made by Head Start and Migrant Education.

Non 329/330/340 Funding Sources
- Medicaid

Problems Encountered
Limited funding for services. Each sick child referred for care often represents an entire household of new clinic users. Medicaid eligibility determinations are made by two different agencies, linguistic and cultural barriers in seeking eligibility. Social and medical specialist services are located a great distance from communities of farmworkers. Private transportation is limited, public transportation is non-existent.

Program History
In 1987 staff and nurses for Migrant Education Program at the elementary school formalized the referral process for farm worker children. Program has been replicated at five satellite clinic sites of the Migrant Health Outreach Program.

Plan for Next 2-5 Years
School-based program to provide primary care services, health education and some social services as major participants in a school district owned Family Resource Center. Once established, the feasibility of expanding program will be studied in other migrant communities.

(714) 877-2392

Type of Program
School-based and School-Linked

Population Served
Predominantly Hispanic; low income and poverty level; Ages 4-18; Rural; Migrant; 665 children.

Health Care and Other Services Provided
- Physicals
- Physical therapy
- Primary care
- Bilingual services
- Immunizations
- Episodic care

Service Providers
- Physical Therapist

Relation to Head Start
Provide services for 2 programs.

Non 329/330/340 Funding Sources
- CHDP

Problems Encountered
School don't promote the program or encourage participation. Some schools fear health centers may be competing for funds.

Program History:
1987 offered free immunizations and exams to children of minority churches. 1989 negotiations were in progress with schools. 1991 at CHDP to 9 schools (pre-school through high school) in 5 school districts.

Plan for Next 2-5 Years:
Continue and expand services.
